

## 04 – Toulouse INP ENSIACET: Engineering School in Chemical Engineering, Material Engineering & Industrial Engineering

The Campus Experience will begin with an opening speech and presentation of the school. This is followed by a tour of the Toulouse INP ENSIACET building & Toulouse INP campus. Participants will then have a chance to network with each other during lunch. Next, participants can take part in workshops and, in smaller groups, tour the AIGEP web lab. Finally, the campus tour will wrap up with another chance to network with peers over drinks.

### **About the institution**

The Toulouse INP-ENSIACET Graduate Engineering School's mission is to train engineers of high scientific and technical levels who want to fulfil their passion for professional projects in the fields of chemical, materials, and industrial engineering.

ENSIACET is a unique hub in Europe in terms of training, research and innovation, both because of its sheer scale and its coherence and synergy between the scientific fields. Each year, close to 300 graduate engineers and 50 doctors trained in research centres provide solutions to technological demands, through interdisciplinarity, cater to societal challenges and dynamics of industry and research centres within the given field, contributing further to the school's reputation.

<b>Time</b>	<b>Activity</b>
09:00–10:00	Session at MEETT: Introduction to the Higher Education in France
10:00–10:45	Transport time from MEETT to Toulouse INP ENSIACET_Campus A7
10:45–11:45	Opening speech and general presentation of the school
11:45–12:30	Visit of Toulouse INP ENSIACET building & Toulouse INP campus
12:30–14:00	Lunch and networking
14:00–14:30	Innovations and sustainability in educational design in Toulouse INP ENSIACET curriculum
14:30–16:00	Campus tour with workshops and visits in small groups (AIGEP, practical work, Web-lab)
16:00–16:45	Farewell drink and networking
16:45–17:05	Transport time from Toulouse INP ENSIACET to city centre
